

5.0 Megapixel Deployable Camera

Model: VSDEPLOYABLECAM

Product Overview

The VSDEPLOYABLECAM is a self-contained, battery-powered camera. The 4 internal C-size batteries allow up to 6 months of standby operation. In standby mode only the passive IR detector is operational. When the camera detects movement it will power on the image sensor and record either images or video to the installed memory card.

The camera can accept up SDHC memory cards up to 32GB (Class 10 or higher recommended). The camera comes standard with a mini-USB cable and TV-out cable for viewing footage. It also comes with a variety of mounting options including a strap for pole or tree mounting, a camera bracket that fits to the tripod nut with screws included.

Ideal uses for the camera are:

- As a wildlife or trail camera. The camera records temperature and lunar phase information, which is overlaid on the recordings.
- As a temporary security camera. The quick mounting options allows the camera to be installed with minimal effort, making it great for construction and other project sites.
- As a long term security camera for remote sites. The long standby time makes the camera ideal for locations that may go months with out being attended, such as farm gates in remote locations.

Specifications

Image Sensor	5.0 megapixel CMOS sensor
Lens Field of View	50° viewing angle
Photo Resolution	Up to 5.0MP
Photo Timelapse	Adjustable: 5 ~ 600s
Video Recording	720P at 20fps with audio (MJPEG)
Video Clip Duration	Adjustable: 1 ~ 600s
Display	B&W matrix display
Infrared LED Type	λ: 940nm, invisible to human eye
Infrared LED Range	18m from 40pcs infrared LED
Motion Sensing	9m range PIR sensor / 48° field of view
Standby Time	Up to 6 months
Storage	SDHC card (up to 32GB)
TV Out	PAL
Ingress Protection	IP54 rated
Power	6V DC (4 x C-size batteries)
Environment	-10 ~ 40°C / 20-85% RH
Dimension	Ø75 x 140mm
Weight	281g (without batteries)
