Product Overview

The VSSELECT101 UTC Video Output Controller changes the video output format of coaxial cameras to HDCVI, TVI, AHD or Analogue. This allows you to configure camera video outputs by simply connecting the VSSELECT101 and pushing a button, saving the hassle of setting up a DVR and monitor for configuration.

When pressed, the Enter button conveniently lights up to show the current video output of the connected camera.

Product Overview

- Supports HDCVI/TVI/AHD/Analogue configuration
- Simple plug-and-play functionality
- Indicator lights show current video output format
- 560mm cable length
- 2 x AAA battery powered

The Enter button has 4 LED lights under it, which will light up to correspond with the current video output format when pressed (as displayed above).
