

CCTV Surveillance Power Supply

18 Channel 12VDC Surveillance Power Supply with Battery Backup

Model: PS12VDC10A18CHB

SECURVIEW

Professional CCTV Surveillance

Overview

The PS12VDC10A18CHB is a premium CCTV surveillance power supply with short circuit and thermal cut-off protection, a secure metal case and support for a backup battery. It is rated for indoor use only.

Product Highlights

- Efficient compact power supply design
- 18 individual fused outputs
- Short circuit, high voltage & over current protection
- Support for backup battery*
- Secure metal chassis with key lock
- Input voltage: AC 100-240V, auto switch
- Output voltage: DC 12V +/-5%
- Total output current: 10A

Suggested Products

Sealed lead acid battery (12VDC 7Ah) for backup battery

D12V7

Thermal Cut-off Protection (TCO)

Each output has an independent PTC fuse and LED indicator. If a problem occurs, only the independent output will be affected.

Short circuit protection

If a short circuit condition occurs, the independent PTC fuse will open the circuit. When the short circuit is removed, the fuse will automatically close.

Battery Backup Support*

Can incorporate a 12VDC / 7.0Ah backup battery to provide power reliability in the event of main power loss.

Secure Metal Case

The secured metal housing provides protection against intrusion and allows for professional-looking cable management.

* Battery not included, sold separately.
